PROFILE

A novice Full stack developer with a strong foundation in web development and a passion for creating high-quality, scalable, and user-friendly web applications. Proficient in all stages of frontend development, including HTML5, CSS3, NodeJS and JavaScript. Experienced in utilizing Bootstrap 5 framework for responsive and mobile-first designs. React JS for building dynamic and interactive user interfaces. Committed to staying up-to-date with the latest advancements in frontend development and eager to continuously learn and grow as a developer. Ability to self-manage and thrive in both independent and team-based projects.

WORK EXPERIENCE

Semantic Tribe

2023 - PRESENT

Full Stack Engineer

- As a frontend developer at Semantic Tribe, I've honed my skills through numerous successful projects now thriving in production environments. With a passion for clean design and seamless user experiences, I am dedicated to deliver top-notch solutions that exceed expectations.
- With a keen eye for detail and a commitment to staying ahead of industry trends, I consistently elevate projects to new heights of functionality and aesthetic appeal.

Busy Bee Technologies

2022 - 2023

Full Stack Engineer

- Leveraged HTML5, CSS3, JS, Bootstrap 5, and React JS for frontend web-app development, including leading an ecommerce platform with an intuitive UI.
- Committed to staying updated with the latest trends, fostering strong teamwork, and delivering cutting-edge solutions through continuous learning.

Busy Bee Technologies

2022

Front-end Intern

- I gained hands-on experience in developing and maintaining front-end web applications using HTML, CSS, Bootstrap, JavaScript, jQuery, and React JS during my internship.
- I spearheaded the front-end development of a custom CRM system, collaborating with backend developers to ensure user-friendly design, security, and scalability.
